

PRODUCT: **Asiatic hard clam**

SCIENTIFIC NAME: **Meretrix lyrata**

DISTRIBUTION: Pacific Ocean, reported from Southern China, Taiwan, Vietnam, the Philippines and Indonesia

FISHING AREA: FAO 61 and FAO 71

FISHING METHOD: Cultured on intertidal flats, based on seed collected from the wild (enhanced fishery). Both seed collection and commercial harvest are done by hand, usually with the aid of a scoopnet, rake or shovel.

SUSTAINABILITY: This method of enhanced fishery is a sustainable activity. One of these fisheries in Vietnam carries certification for sustainability since 2009 and was the first fishery in South East Asia to receive this.

PRESENTATION: Chilled, frozen, preserved

PACKAGING FORMS: Trays, bags, vacuum bag, cans

PRODUCT: **Atlantic surf clam**
